CAREER & COLLEGE READY!

NEASC (NEW ENGLAND ASSOCIATION OF SCHOOLS AND COLLEGES) ACCREDITED.
At Grasso Tech, we believe that all students can learn and succeed, and we understand that all students learn at different rates. Therefore, differentiated instruction is at the heart of our education model. Our talented academic and career technology teachers prioritize developing positive, educational relationships with their students and establish high expectations for all.

Our unique, high-tech educational program prepares Grasso Tech graduates for immediate employment, entry into apprenticeship programs or admission into a two- or four-year college.

Ninth-grade students participate in all of the technical programs offered at Grasso Tech through the Exploratory Program. This experience allows students to engage in the various career path opportunities before choosing one that will set the framework for their education in grades 10-12. Students take academic and career technology courses on a nine-day rotating cycle, which provides ninety days of instruction in academics and ninety days of instruction in career technology courses.

At Grasso Tech, Work-based Learning (WBL) is offered as a way for students in grades 11 and 12 to gain real-world experience, work in teams, solve problems and meet employers’ expectations. It takes place during the school day and students not only receive credit toward their career technology, but they also get paid. Through partnerships with local companies, students work on real projects, gaining hands-on career development experience. Students also participate in production work, contracting with real customers to complete real jobs. From automobile repair to building a house, the work helps prepare students for transition from high school to the workforce.

Our Career Technologies include:

- Automotive Collision Repair & Refinishing
- Automotive Technology
- Bioscience & Environmental Technology
- Culinary Arts
- Digital Media & Sound Production
- Electrical
- Guest Services Management
- Hairdressing & Cosmetology
- Information Technology
- Mechanical Design & Engineering Technology
- Plumbing & Heating
- Welding, Metal Fabrication & Shipfitting

Connecticut Technical Education and Career System (CTECS) graduates are prepared for working and learning environments that constantly change. By adapting to new standards in emerging technologies, students acquire the necessary skills to succeed in the college classroom and in the work place.

By integrating STEM education into our academics and career technologies, along with guidance from industry leaders, Grasso Tech students graduate with industry certifications or licenses, post-secondary certificates or degrees that employers use to make hiring and promotion decisions. These graduates are empowered to pursue future schooling and training as their educational and career needs evolve, positioning them to be the country’s next leaders and entrepreneurs.
